

Basil Meer

Full-Stack Software Engineer

✉ basilmeer@gmail.com ☎ +92 336 412 4066 📍 Lahore, Pakistan 🌐 <https://basilmeer.com> 📄 [in/basilmeer](https://www.linkedin.com/in/basilmeer) 🐙 [basilmeer](https://github.com/basilmeer)

Summary

Software engineer with 10 years of experience across backend development, cloud infrastructure, and UI/UX design. Skilled in Ruby on Rails, React, TypeScript, Go, and database architecture, with experience building MVPs, modernizing legacy systems, and automating deployment pipelines. Focused on reliable, maintainable software and intuitive user experiences.

Experience

Esseal LTD

Remote

Managing Partner

January 2025 – September 2026

- Co-founded a development agency delivering full-stack applications and legacy modernization projects, owning technical delivery from architecture to deployment.
- Built backend services with Ruby on Rails and Go, alongside TypeScript/React interfaces.
- Implemented Docker environments and CI/CD pipelines, and integrated LLM capabilities into client products.

CareCloud

Remote

Senior Software Engineer (Consultant)

January 2025 – April 2025

- Collaborated with engineering teams in Pakistan and the US to maintain and modernize enterprise healthcare software.
- Diagnosed and resolved complex legacy codebase issues to improve system reliability.
- Planned migrations from Ruby 2/Rails 4 to Ruby 3/Rails 6 and provided architectural guidance and technical documentation.

<https://carecloud.com>

DeltaLabs

Lahore, Pakistan

Senior Software Engineer

February 2020 – August 2024

- Led and mentored two engineering teams delivering complex projects for international clients.
- Gathered requirements, defined project scope, and designed scalable, maintainable application architectures.
- Managed milestones, backlogs, and issue resolution using ClickUp and Jira to support timely delivery.

Seers

Lahore, Pakistan

Frontend Developer & UI/UX Designer

November 2018 – January 2020

- Created visual design systems, high-fidelity UI/UX mockups, and graphics for websites and social media.
- Translated product concepts and designs into responsive web interfaces using Vue.js.
- Collaborated with backend engineers to integrate RESTful APIs and manage application state

<https://seersco.com>

Veteranlogix

Lahore, Pakistan

Full-Stack Engineer

January 2017 – March 2018

- Developed, tested, and deployed custom web applications using Laravel, PHP, and JavaScript.
- Resolved frontend and database issues and introduced clean code practices and structured Git workflows.
- Led UI design work and mentored new hires and junior engineers.

<https://www.veteranlogix.com>

Hobuddies (Pvt) Ltd.

Full-Stack Engineer

Lahore, Pakistan

January 2017 – March 2018

- Led the migration from Laravel to React and Ruby on Rails, and developed APIs for the mobile application.
- Introduced Git-based version control and Trello/Scrum workflows to improve development coordination.
- Prototyped mobile interfaces for a transition from native Android to Ionic and created brand and marketing graphics.

Freelancing

Remote

Web Designer & Video Editor

December 2016 – December 2017

- Designed website themes in Adobe Photoshop and implemented responsive layouts using HTML, CSS, and vanilla JavaScript.
- Created marketing pages to support client sales and promotional campaigns.
- Produced animations and video edits using Adobe After Effects and Adobe Premiere.

InnoverseTech

Lahore, Pakistan

Graphics Designer

April 2016 – March 2017

- Designed digital and print graphics and managed visual assets for client projects.
- Collaborated with developers to create intuitive interfaces and improve user experience.
- Built web interfaces using HTML, SCSS, and JavaScript.

Projects

Helios

A full-stack solar inverter monitoring platform using React, TypeScript, and Ruby on Rails, with live telemetry over Modbus TCP. Automated WhatsApp alerts for grid outages, restoration, and high-load conditions through background monitoring and the WhatsApp Cloud API.

<https://helios.nova.basilmeer.com>

GroundSignal

A multi-tenant estate operations platform for managing work across geographically distributed sites. Supports work planning, assignment, and tracking through interactive maps. Provides role-based access and auditable job workflows.

<https://groundsignal.nova.basilmeer.com>

SlateInvoice

An invoicing platform for creating and managing invoices throughout their lifecycle. Organizes client records and tracks payments. Supports secure authentication and business profiles.

<https://slateinvoice.nova.basilmeer.com>

Mockingbird

A mock data platform for QA, prototypes, and demos. Serves realistic, repeatable payloads through REST and GraphQL APIs.

<https://mockingbird.nova.basilmeer.com>

Overwatch

An AI-powered enterprise Project and Resource Management platform that centralizes workforce, equipment, and subcontractor scheduling, conflict tracking, and reporting. Supports team collaboration, task management, and role-based access control.

<https://theoverwatch.ai>

SnapStock

An AI-powered inventory management system using React, Ruby on Rails, Go, and PostgreSQL to turn document images into reviewable stock updates. Integrated Qwen2.5-VL for automated data extraction, with asynchronous processing and real-time WebSocket updates to streamline inventory entry.

GymRegime

A browser-based application for creating and tracking workout routines. Provides muscle-group mapping and curated exercise recommendations.

https://gymregime.io

Curbside Health

A clinical pathways and governance software platform that helps health systems turn static medical guidelines into interactive, electronic health record (EHR)-integrated decision support

https://www.curbsidehealth.online

PocketMed

A full telehealth consultation platform for online weight-loss programs connecting patients with licensed providers. Included a back-office CRM for order tracking, logistics, discounts and leads management.

Education

Virtual University of Pakistan

Computer Science

Bachelor of Science (BSc)
Lahore, Pakistan • 2017 - 2021

freeCodeCamp

Computer Software Engineering

Full Stack Web Development Certification
2017 - 2018

Skills

Backend Development

Ruby on Rails, Ruby, PHP, Laravel, Go, REST APIs, GraphQL

Database Design & Development

PostgreSQL, MySQL, Relational Modeling, Schema Design, Query Optimization

Software Architecture

Multi-Tenant Applications, Backend Architecture, Legacy Modernization, API Design, Scalable Systems

Technical Leadership

Team Leadership, Mentoring, Requirements Gathering, Project Scoping, Code Review, Agile, Scrum, Jira, ClickUp

Caching, Search & NoSQL

Redis, Elasticsearch, MongoDB

Frontend Development

React.js, TypeScript, Next.js, Vue.js, Redux

DevOps & Cloud Infrastructure

Docker, GitHub Actions, CI/CD, AWS, Nginx, Phusion Passenger, Deployment Automation, Digital Ocean, Hetzner, Coolify, Heroku, Linux

UI/UX Design

Figma, Adobe Photoshop, Wireframing, Prototyping, Design Systems, Responsive Design, Tailwind CSS, Material UI

Observability & Monitoring

OpenTelemetry, SigNoz, New Relic, UptimeRobot, Telemetry, Application Monitoring

AI Integration

LLM Integration, Workflow Automation, AI-Powered Application Features
